

COLLIERS INTERNATIONAL

Research

The Research at Colliers International provides a full range of research services to both local and multinational corporations addressing various aspects of the real estate market in Indonesia.

Together with a team of experienced and highly skilled professionals from diverse backgrounds, Colliers has the capability to provide our clients with the best property research.

MARKET INTELLIGENCE

The experienced team provides in-depth property market research.

With a comprehensive database and a keen understanding of the property market, Colliers has advised numerous clients in making excellent real estate investment decisions. Moreover, we are able to provide them with accurate and timely market information, precise interpretations of the market and effective recommendations that are tailor-fit to our clients' needs.

Colliers' network of offices worldwide continuously provides us with a global mindset on real estate practices around the world, thus giving our clients up-to-date developments in the real property industry.
