Service Excellence

Service is a cornerstone of the restaurant business – and ours as well. Colliers International Restaurant Services Group was created to ensure that our clients have the best possible experience and that the level of service you receive is consistent no matter what market you may be in.

The challenges that many restaurant owners face require a team of professionals that possess specialized product knowledge that can assist you locally but also can help you expand into new markets. Our team understands the importance of finding just the right location for your restaurant and how important demographics and lease negotiation can be in that search.

Whether you are a new start up seeking your first sight or a multi-location chain seeking to expand in a large geographic area or nationally – or looking to consolidate - we can assist. Our local touch and national reach ensures that we can take your expansion plans where they need to go. Our restaurant team covers every major North American market and provides customized solutions one restaurant at a time.
