

SAN FRANCISCO PENINSULA RESEARCH & FORECAST REPORT

The Market Marches On

OFFICE OVERVIEW

It would be unrealistic to expect the San Francisco Peninsula commercial real estate market to open 2012 at the same fevered pace seen during the prior year. The local market, very much in keeping with the national picture, has seen some modest slowdown in activity to start off 2012. But in a region sporting one of the lowest unemployment rates in the nation, continued solid venture capital investment and significant leasing by individual companies that clearly anticipate dramatic growth, the prospects for continued strengthening of the local market appear positive.

The office vacancy rate for the San Francisco Peninsula closed the first quarter of 2012 at 11.8 percent, a slight increase from the prior quarter, but notably stronger than the 14.5 percent seen at this time last year. Similarly, the vacancy rate for San Mateo County stands at 12.5 percent, essentially unchanged from the prior quarter but markedly stronger than the 15.2 percent a year ago. Despite the momentary leveling in the vacancy rate, average asking rents continued their climb. San Francisco Peninsula's average asking rent is \$3.46 psf, while San Mateo County's rent is \$3.24 psf, their highest since late 2008.

For the first time since late 2010, the San Francisco Peninsula office market added more square footage to the available inventory than it absorbed. Net absorption for the quarter was a modest negative 71,735 square feet, with the bulk of the imbalance caused by 96,050 square feet of negative absorption in Palo Alto. San Mateo County's net absorption nearly broke even at negative 5,230 square feet. Perhaps more noteworthy is the dip in gross absorption, a measure of all leasing activity in a market area. The gross absorption total of 1.33 million square feet is the lowest on the San Francisco Peninsula since the close of 2010, and is below the averages seen in the last strong market cycle of 2006-2007. A sizable portion of this drop can certainly be attributed to the lack of available large blocks of space in the local market.

MARKET INDICATORS

	Q4 2011	Q1 2012	
VACANCY RATE	12.5%	12.5%	↔
TOTAL VACANCY	4,384,766	4,390,036	↔

NET ABSORPTION	489,368	(5,230)	↓
WTD AVG ASKING RENT	\$2.95	\$3.24	↑

"Even if activity does wane some this year in comparison to 2011, there is little reason to expect any significant ramifications."

This quarter marks the first time vacancy has increased in ten quarters. However, San Mateo County average asking rates have risen the past six consecutive quarters.

- 10. Redwood City
- 11. Menlo Park

SAN MATEO COUNTY OFFICE HISTORICAL RENT VS VACANCY

Big deals were the most noteworthy component of the 2011 market boom, and that trend may be continuing. While there may be fewer large 'campus' users active on the Peninsula than at this time last year, over 55 percent of the leasing activity in San Mateo County this past quarter was generated by transactions of over 20,000 square feet, a significantly higher proportion than the prior three quarters. Transactions of note on the Peninsula in the first quarter of 2012 include Evernote's expansion into 85,891 square feet in Redwood City, Nuance's 68,554 square foot downtown Mountain View build-to-suit, and Heartflow's 102,981 square foot lease in Pacific Shores, Redwood City.

While rents in the benchmark downtown Palo Alto market appear to have stabilized, other submarkets bearing similar in-demand amenities and transit access have continued to strengthen. Downtown Redwood City (despite a modest spike in vacancy this quarter) has seen average asking rents rise to \$3.29 psf, an increase of nearly 20 percent since mid-2011. Downtown San Mateo has also seen steady improvement, with rents there now exceeding \$3.00 psf.

The San Francisco Peninsula office market appears to be in a pronounced upswing, but rents for some sectors may have already stabilized. Even if activity does wane some this year in comparison to 2011, there is little reason to expect any significant ramifications. We expect to see continued growth in 2012 at a more subdued pace than last year.

R&D/INDUSTRIAL OVERVIEW

The San Mateo County R&D and industrial markets both posted negative net absorption during the first quarter of 2011. R&D net absorption stood at negative 117,922 square feet, which marks the first negative total in four quarters. The industrial market's first quarter net absorption was negative 140,128 square feet. While both R&D and industrial sectors dipped in the negative, it did not slow activity throughout the Peninsula. Our expectation is that the stabilizing market will continue.

SAN MATEO COUNTY R&D HISTORICAL RENT VS VACANCY

The County's R&D vacancy currently stands at 15.5 percent, a slight increase from last quarter's 14.9 percent; however, the current vacancy rate is two percentage points lower than the same quarter last year when vacancy was 17.5 percent. The County's average asking rate in the first quarter of 2012 rose to \$1.92 NNN, which is the highest the rate has been since the fourth quarter of 2007. With rates continuing to rise in all building types on the Peninsula, look for continued growth in asking rents throughout the year.

*THE SOUTH PENINSULA CITIES OF MOUNTAIN VIEW AND PALO ALTO ARE FOR REFERENCE PURPOSES AS THEY ARE NOT INCLUDED IN THE SAN MATEO COUNTY MARKET TOTALS BELOW.

R&D activity in San Mateo County showed positive signs to begin the year. The County's R&D gross absorption in the first quarter was 215,711 square feet; which is similar to 2011's average quarterly gross absorption of 205,000 square feet. It is important to note that gross absorption for 2011 totaled 822,843 square feet, the highest since 2007 when it was 987,429 square feet. Menlo Park was the most active submarket, accounting for 95,521 square feet of gross absorption in the first quarter. Pan Pacific's lease of 39,500 square feet was a noteworthy transaction in Menlo Park.

The San Mateo County industrial market closed the quarter with a 9.2 percent vacancy rate, which is a slight increase from 8.8 percent last quarter. While industrial average asking rents remained flat throughout 2011, the first quarter of 2012 displayed an increase of \$0.05 to \$0.82 NNN. Industrial gross absorption was 636,968 square feet, the largest gross absorption total in the past six years. Not surprisingly, the largest industrial submarket, South San Francisco, was once again the most active submarket accounting for 39 percent of the County's gross absorption.

Overall, the R&D and industrial markets have started 2012 with positive activity and our expectation is that the stabilizing market will continue. While we expect improvement on the Peninsula in 2012, we believe it will be a gradual process and will most likely trail the office market, which has shown excellent activity over the past year.
