

Colliers Sustainability Manifesto

Doing the right thing for our customers, for ourselves and for our communities is among Colliers' key values.

That's why we're committed to leaving a positive footprint on the planet by generating positive development conditions and minimizing global risks related to economic, social and environmental sustainability.

We believe that this can only be achieved with our employees, customers and suppliers and we're ready to have them on our journey.

Our strategic and technical solutions can drive our industry into a more sustainable future by ensuring the best performance for our customers and their stakeholders.

Roberto Nicosia
Ceo, Colliers International Italia

01.

Rethinking the way we work

while respecting human capital, suppliers, soil and urban patterns.

Promoting the use of sustainable materials and picturing their use, disposal and reuse within an endless loop.

02.

Building responsibly

by working responsibly on properties, improving environmental performance and reducing consumption, emissions and waste.

03.

Protecting the well-being of the people

- employees, suppliers, customers - who allow our business to grow every day and promoting inclusion and gender equality in every respect.

04.

Working closely with suppliers and customers

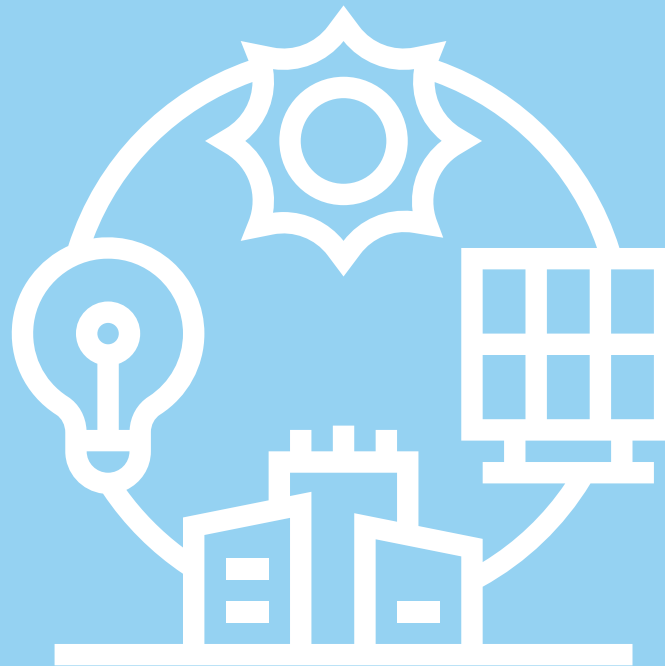

to facilitate change and the environmental and social sustainability of the entire supply chain.

05.

Growing in harmony

with local communities by promoting their well-being, health and development.

Our guiding principles

Sustainability is a pillar of our strategic advice and enables our integrated services platform to support every kind of requirement.

Our customers will get multiple benefits:

Cost savings

Legislative and regulatory compliance

Healthier work environments

Protected and enhanced corporate reputation

Increased transparency

Client advice and services
